

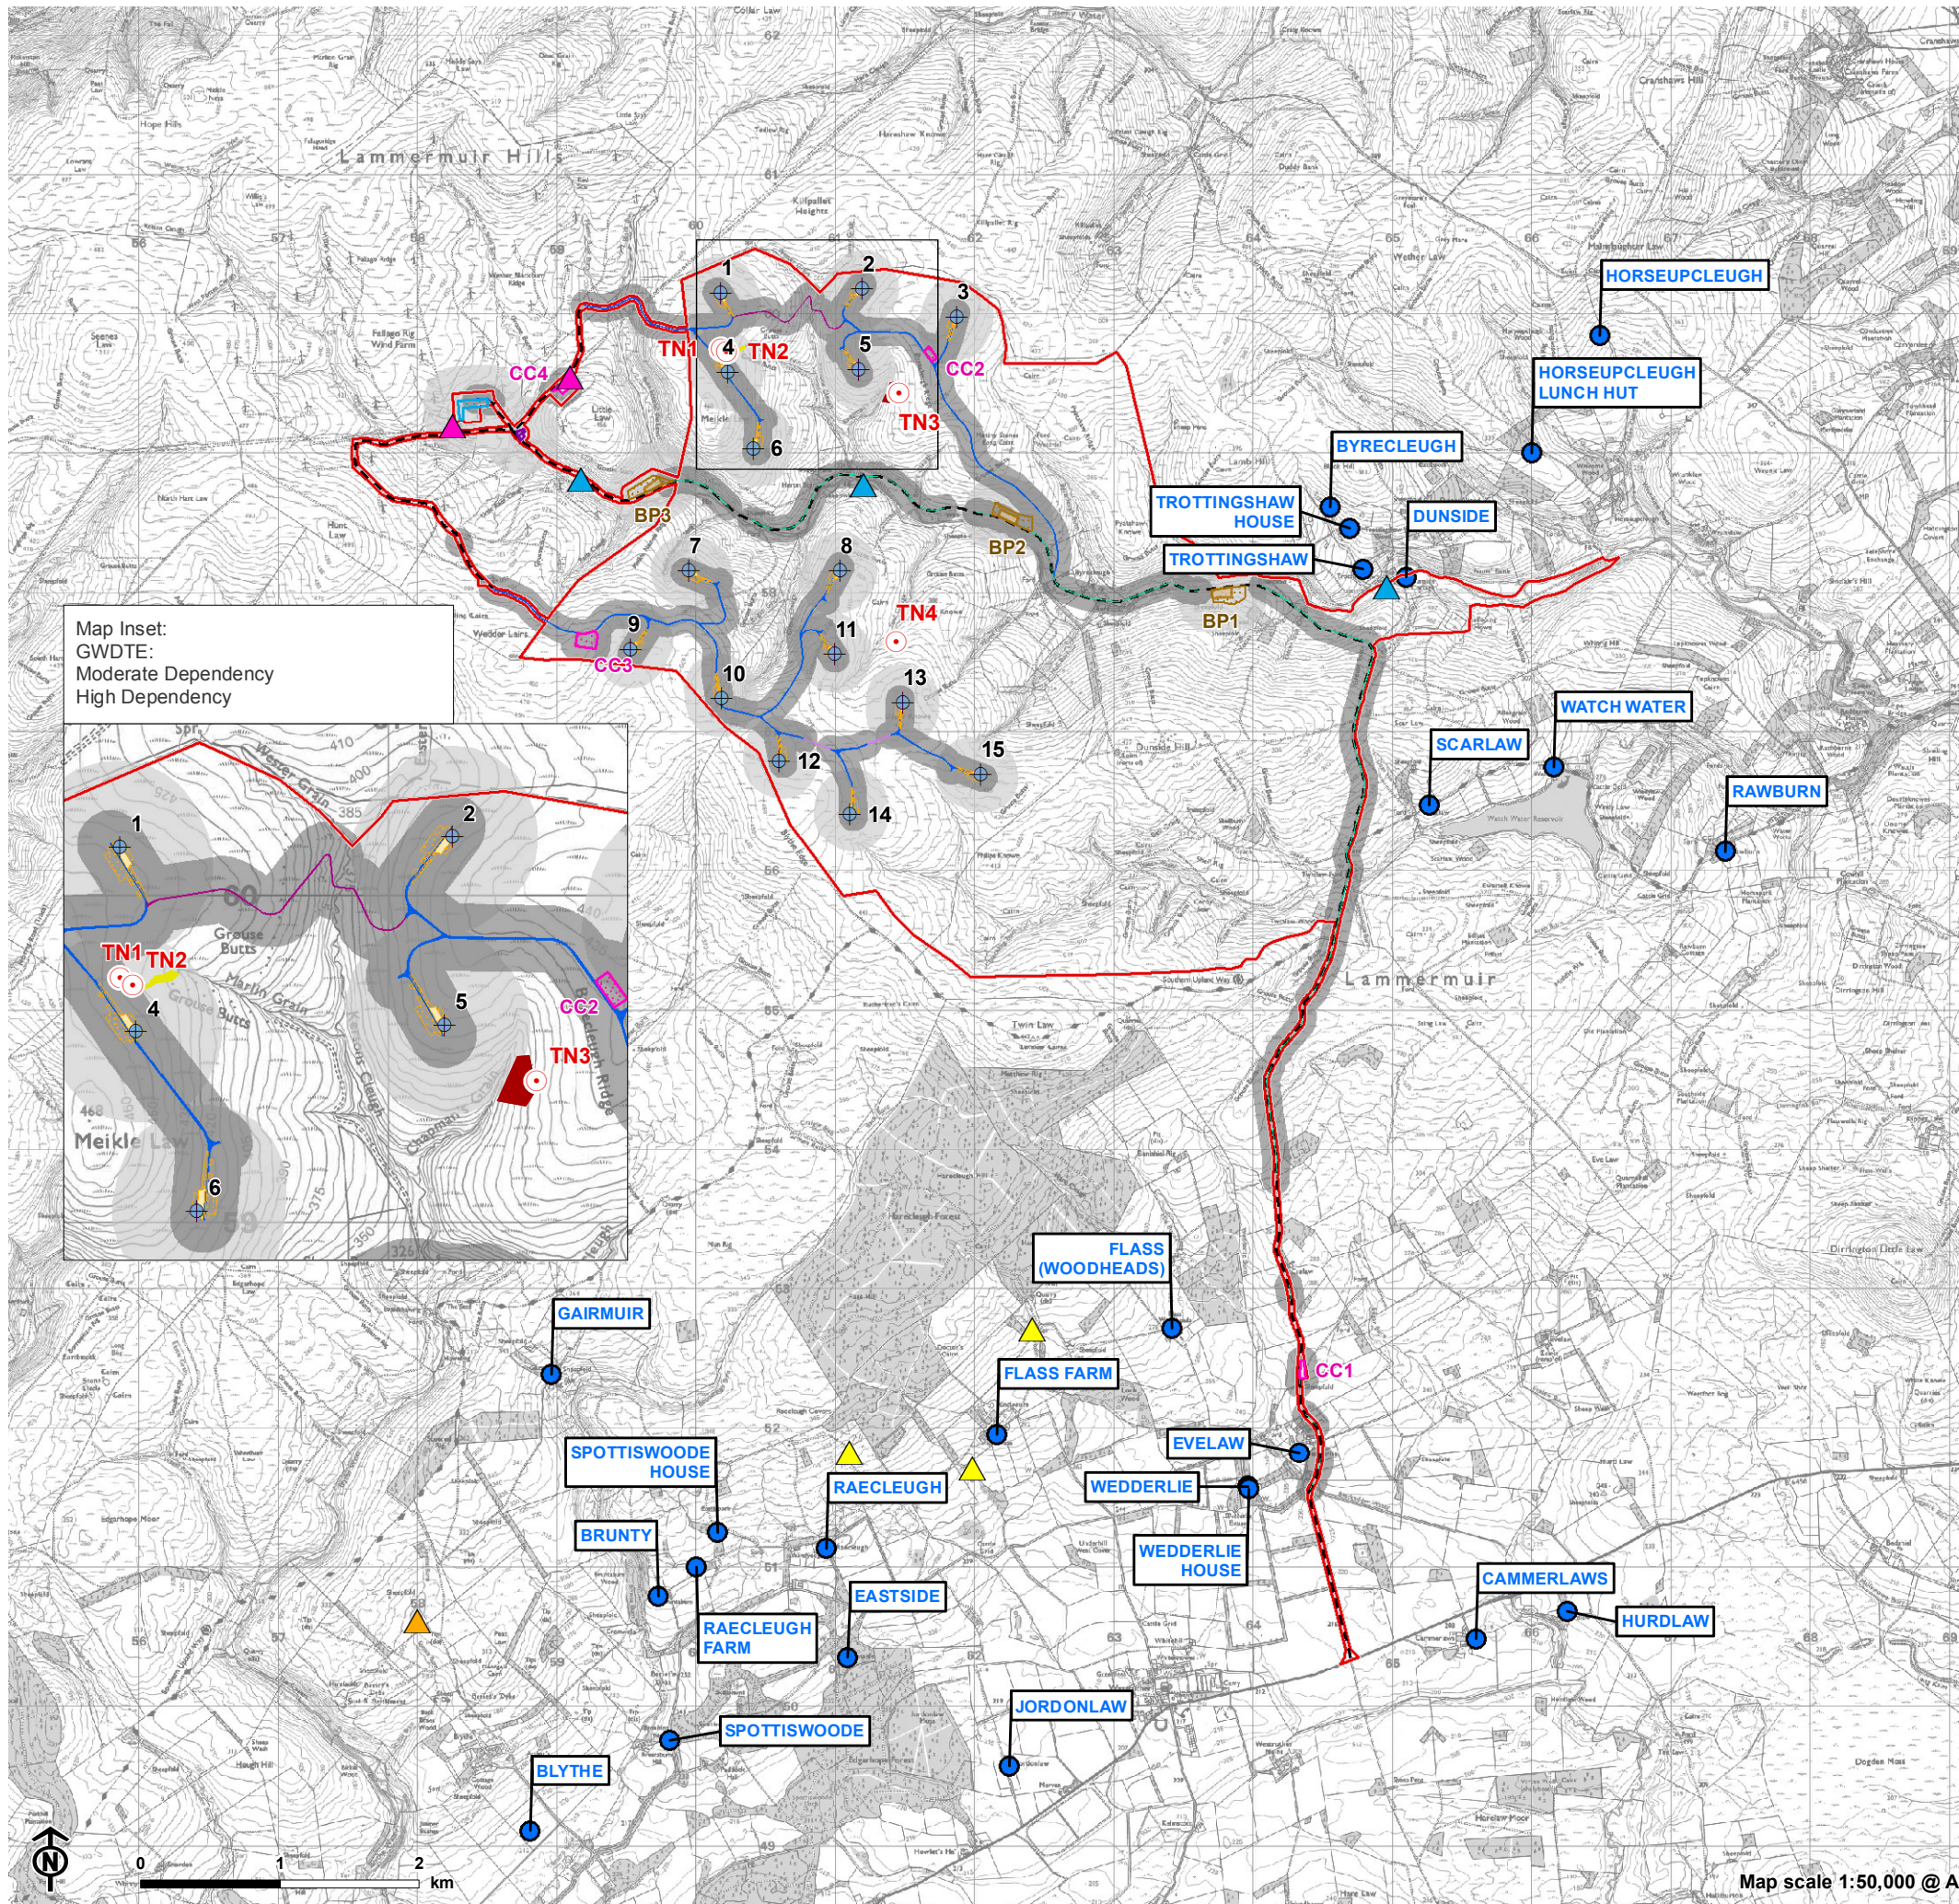

Figure 8.3: Ground Water Dependent Terrestrial Ecosystems (GWDTE), Groundwater abstractions and Private Water Supplies)

- Turbine
- Site Boundary
- Substation extension
- Construction compound
- Existing construction compound
- Borrow pit
- Borrow pit search area
- Temporary hardstanding
- Permanent hardstanding
- Battery storage
- Proposed new track (floating)
- Proposed new track
- Proposed light vehicle track (3m wide)
- Proposed existing track upgrade
- Existing track

Ground Water Dependent Terrestrial Ecosystems (GWDTE), Groundwater abstractions and Private Water Supplies)

- GWDTEs**
- Moderate Dependency
 - High Dependency
 - GWDTE Target Notes
- Abstraction Data from SEPA**
- Reservoir
 - Surface water
 - Groundwater
 - Spring
 - PWS source
 - 100m infrastructure buffer
 - 250m infrastructure buffer

Notes:
The infrastructure buffer consists of:
- 250m buffer around turbines and borrow pits (excavations deeper than 1m)
- 100m buffer around proposed and upgraded tracks, construction compounds (excavations shallower than 1m)
